Classroom: X

Class Meeting Time: XXX

COURSE SYLLABUS

Course Description

This course prepares students to use artificial intelligence (AI) in modern marketing practice. As companies increasingly rely on AI tools to generate content, analyze customer data, personalize experiences, and automate decisions, there is growing demand for marketers who can effectively work with and manage AI systems.

The course takes a hands-on, applied approach to AI in marketing. Students will learn how to use AI tools to design marketing campaigns, generate and evaluate content, analyze customer insights, and build AI-assisted customer experiences. Rather than focusing on technical programming, the course emphasizes practical skills, strategic thinking, and critical evaluation of AI outputs.

Throughout the semester, students will work on real-world marketing tasks using AI tools and develop a semester-long project where they design an AI-powered marketing strategy for a business. The course is designed to reflect how AI is currently used in industry and to prepare students for roles where the ability to effectively use AI is a key competitive advantage.

Course Learning Objectives

By the end of the course, students will be able to:

- Use AI tools to generate and refine marketing content (ads, emails, social media)
- Apply prompt design techniques to improve AI-generated outputs
- Analyze customer insights using AI-assisted methods
- Evaluate AI-generated marketing content in terms of effectiveness, clarity, and trust
- Design AI-supported marketing strategies across the customer journey

- Develop and present a complete AI-driven marketing plan
- Critically assess the strengths and limitations of AI in marketing decision-making

Course Requirements & Assessment

A. INSTRUCTIONAL METHODOLOGY:

This course is highly hands-on and application-focused. Each class session includes:

- Short conceptual lectures
- Live demonstrations of AI tools
- In-class exercises where students actively use AI
- Group-based activities simulating real marketing tasks

Students will regularly create, test, and refine marketing outputs using AI tools. Many activities are designed to mirror how marketing teams use AI in practice.

A semester-long group project allows students to apply these skills in a realistic business context.

B. ATTENDANCE:

This is an on-ground class and consistent attendance is expected. The course outline shows that you will miss the grades of in-class activities if you skip the sessions. Also, for every unexcused absence, 10 pts will be taken off your final grade. Following is the attendance rule:

If you have a medical condition that results in more than two absences and want the absences to be excused, you must provide documentation to the Dean of Students Office, who will verify your condition and notify me.

Please do not request to attend on Zoom. Unless you have a permission from the Accessibility Resource Center online attendance is not permitted.

C. COURSE REQUIREMENTS:

Individual Assignments:

Students will complete a set of individual assignments throughout the term that allow them to develop practical skills in using artificial intelligence for marketing tasks. These assignments involve generating, evaluating, and refining marketing outputs using AI tools, including activities such as prompt design, customer insight extraction, and content improvement. While AI tools are used in completing these assignments, students are expected to demonstrate their own understanding through critical evaluation, iteration, and explanation of their approach. Overall, individual assignments carry 20% of your final grade. Assignment materials will be posted on Canvas.

Group Project:

Students will work in teams on a semester-long project in which they develop an AI-powered marketing strategy for a real or simulated business. The project is completed through multiple milestones across the semester, including customer segmentation, content development, customer experience design, and testing strategy. This project reflects how AI is used collaboratively in modern marketing environments. While the project is completed in teams, each student is expected to contribute meaningfully and demonstrate individual understanding of the work. The group project **carries** 35% of your final grade (Project + Final Presentation=350 points).

Make-up Assignments: Make-up assignments will only be granted under documented, university-approved circumstances.

Online Certificates: TBA

Examinations:

Midterm and Final Exam:

Exams in this course are AI-based and application-driven. Students will use AI tools to complete a series of marketing tasks and will be evaluated on how effectively they apply AI to generate, refine, and evaluate marketing outputs.

Each exam will include structured tasks such as:

- generating marketing content using AI
- improving prompts to achieve better outputs
- analyzing customer insights using AI
- evaluating and critiquing AI-generated marketing materials

Students will complete the exams in class using their laptops, with access to approved AI tools. However, performance will not be based on the output alone. A substantial portion of the grade will depend on your ability to:

- justify your prompt choices
- explain how and why outputs improved
- identify limitations or errors in AI-generated results
- make sound marketing decisions based on AI outputs

This ensures that exams assess your skill in using AI as a marketing tool, rather than simply generating content.

You may also bring any printed or written materials you find helpful. Readings, class materials, assignments, and in-class activities will all be covered.

We will not assess technical or programming skills. The focus is on applied use of AI in marketing contexts and your ability to think critically about the outputs.

The midterm exam will be held during the semester (see course schedule), and the final exam will take place at the university-appointed time and location.

If a student misses an exam without a documented, university-sanctioned reason or approved alternative, their exam score will be set to 5 points below the minimum exam score in the section. Please plan accordingly to avoid missing exams.

Make-up Examinations: If you are unable to take an exam, you must inform me before the scheduled exam time. A make-up exam will only be granted for a valid reason, such as a documented medical issue, family emergency, or university-affiliated activity. You must provide appropriate documentation to support your request. If approved, the make-up exam must be completed within one week of the originally scheduled exam.

Expectations

- Ability to self-discipline (time management, independent learning) and actively engage with hands-on, application-based instruction

- You are required to bring your own laptop to class, as many sessions involve live use of AI tools and in-class exercises
- Willingness to experiment with and learn new AI tools used in marketing contexts
- Ability to think critically about AI-generated outputs and not rely on them without evaluation
- Ability to work cooperatively in team-based projects and group activities that simulate real marketing environments
- Ability to clearly communicate ideas, justify decisions, and explain how AI was used in your work
- Ability to document and explain how AI tools were used to support marketing decisions

Grading

Grades earned are based on your performance on homework, quizzes, exams and the final exam.

Gradable Component	Description	Points
Midterm Exam (Individual)	AI-based exam evaluating ability to generate and evaluate marketing outputs using AI	200
Final Exam (Individual)	Comprehensive AI-based exam focused on AI-driven marketing decisions	200
Individual Assignments (4 total)	Applied assignments (prompting, evaluation, insights, improvement) (50 points each)	200
Group Project Milestones (4 total)	Team-based development of AI marketing strategy (50 points each)	200
Final Group Project (Report + Presentation)	Final integrated AI marketing strategy	150
Participation & In-Class Activities	Engagement in hands-on exercises and activities	50
Total		1000

Late submissions will get 20% reduction penalty. Do not wait for the last day to complete and submit your assignments.

Final Grades are assigned with the following scale:

Undergraduate Scale

Grades Scored Between	Letter Equivalents
93 to 100	A
90 to Less than 93	A-
87 to Less than 90	B+
83 to Less than 87	B
80 to Less than 83	B-
77 to Less than 80	C+

73 to Less than 77	C
70 to Less than 73	C-
67 to Less than 70	D+
63 to Less than 67	D
60 to Less than 63	D-

Graduate Scale

Grades Scored Between Letter Equivalents

93 to 100	A
90 to Less than 93	A-
87 to Less than 90	B+
83 to Less than 87	B
80 to Less than 83	B-
77 to Less than 80	C+
73 to Less than 77	C
70 to Less than 73	C-
Less than 70	F

Course Outline/Schedule

Week	Topic	In-Class Activities	Assignments & Milestones
Week 1	Introduction to AI in Marketing	AI vs. Human content challenge; overview of AI tools in marketing	Project teams formed + business selection
Week 2	AI & Consumer Behavior	Evaluate AI vs. human outputs (persuasion, trust, control)	Assignment 1: AI vs Human Evaluation
Week 3	Prompting as a Marketing Skill	Prompt design, iteration, and output improvement	Assignment 2: Prompt Engineering Lab
Week 4	AI for Market Research & Consumer Insights	Analyze customer reviews and extract insights using AI	Assignment 3: Customer Insight Mining + Milestone 1: Segments & Personas
Week 5	Synthetic Data & AI-Generated Consumer Insights	Generate synthetic consumer profiles and survey responses using AI; compare synthetic vs. real data quality and validity	—
Week 6	AI-Driven Content Creation & Brand Voice	Develop brand voice and generate marketing content	—

Week 7	Social Media Strategy & Content Planning with AI	Build content calendars and platform-specific strategies	Milestone 2: AI Content System
Week 8	Fall Break	—	—
Week 9	AI-Enhanced Advertising & Campaign Design	Generate, compare, and refine ad variations	—
Week 10	Visual Marketing & Creative Generation with AI	Create campaign visuals and evaluate outputs	—
Week 11	Customer Experience Design & AI Chatbots	Design chatbot or AI-supported customer journey	Milestone 3: Customer Experience Design
Week 12	Personalization & Recommendation Strategies	Design personalized marketing strategies	—
Week 13	AI-Driven Marketing Analytics & Insights	Interpret campaign data and AI-generated insights	—
Week 14	Experimentation, A/B Testing & Optimization	Design experiments and optimize AI-generated content	Assignment 4: AI Content Critique & Improvement + Milestone 4: Testing Plan
Week 15	AI Strategy Integration & Final Presentations	Final project integration and presentations	Final Project Submission & Presentation
Week 16	Final Exam	—	—

Diversity Statement

The University of New Haven embraces diversity and recognizes our responsibility to foster a diverse, inclusive, and welcoming environment in which all members of the Charger community of all backgrounds and identities can learn, work, and live together. We benefit from the academic, social, and cultural developments that arise from a diverse campus that is committed to equity, inclusion, belonging, and accountability.

We have a responsibility as a community and as individuals to address and remove barriers, achieve success, and sustain a culture of inclusivity, empathy, kindness, and compassion. We encourage, welcome, and embrace participation in ongoing dialogue, engagement, and education

to critically examine and thoughtfully respond to the changing realities of our community. Diversity, equity, inclusion, acceptance, and belonging enrich the Charger community and are instrumental to institutional success and fulfillment of the University mission.

Reporting Bias Incidents

At the University of New Haven, there is an expectation that all community members are committed to creating and supporting a climate which promotes civility, mutual respect, and open-mindedness. There also exists an understanding that with the freedom of expression comes the responsibility to support community members' right to live and work in an environment free from harassment and fear. It is expected that all members of the University community will engage in anti-bias behavior and refrain from actions that intimidate, humiliate, or demean persons or groups or that undermine their security or self-esteem.

If you have an immediate safety concern for yourself or others, and/or believe someone poses an immediate threat to themselves or others, please contact University Police at 203-932-7070 or call 911. Community members can report bias-motivated incidents by completing the form at www.newhaven.edu/biasreporting. Community members are encouraged to complete this form if they are the target of bias or harassing behaviors, witness such behaviors, or gain knowledge of these behaviors occurring within the University community. All matters concerning bias and harassment will be handled by the Dean of Students Office and Human Resources Office.

University-wide Academic Policies

A continually-updated list of University-wide academic policies and descriptions of key university student resources, can be found on Canvas. You can access them by simply clicking on the (?) help button.

The University-wide academic policies include (but are not limited to) the University's attendance policy, procedures for both adding / dropping a course and course withdrawals, an explanation for the sorts of circumstances where incomplete (INC) grades could be considered by the faculty, and the academic integrity policy (among others). Also in this location you will find information regarding the process for reporting bias and topics related to our maintaining a positive learning environment (including, but not limited to, discrimination and sexual misconduct).

The list of key university student resources to enable learning include (but are not limited to) the University's Center for Student Success, Writing Center, Center for Learning Resources, and the Accessibility Resource Center.

Course Delivery Options (choose the statement that describes the modality of *your* course).

*For courses with a location of ONLI that also list time and day information, students should plan to be available during that time for synchronous online learning. Classes with no time listed are asynchronous, fully online, and coded ONLI. Due to social distancing requirements, some courses will be offered in Hybrid or Flex formats. **Online learning may occur at any time, depending on how the University may determine classes are best taught under any circumstance.** All courses, including selected labs, practicums, project-based, and clinical courses may require limited, additional meeting times to accommodate accreditation, regulatory,*

and similar requirements and students will be advised about this at the beginning of those classes.

Hybrid: Students attend in-person for half of the scheduled course time and the other half of the class content is available online. Students are only required to attend in-person on their designated day(s) and students **need not attend classes virtually**.

Online asynchronous (ONLI): Fully online asynchronous course with **no live, required class sessions**.

Remote synchronous (ONLI with specific meeting time): Fully online synchronous course. **Students attend virtually at the assigned class time.**

Flex: Half of the students attend each class session in-person and the other half attends virtually at the same time.

On-Ground: Fully on-ground course with every student meeting in-person.

Clinical/Laboratory: Practical courses that have an on-ground required component.

UNIVERSITY STUDENT SUPPORT SERVICES

The University recognizes that students can often use some help outside of class and offers academic assistance through several offices.

Accessibility Resources Center

Students with disabilities, chronic health-related conditions, or military service-connected disorders are encouraged to share, in confidence, information about course specific approved reasonable accommodations. The Accessibility Resources Center, located in Sheffield Hall, is responsible for and committed to providing supports and

resources that serve to promote educational equity and ensure that students are able to participate in the opportunities available at the University of New Haven. Reasonable accommodations are not made without written documentation from the Accessibility Resources Center.

The Accessibility Resource Center can be reached at (203) 932-7332 or by email at AccessibilityResCtr@newhaven.edu. For additional information, please refer to the Accessibility Resource Center (ARC) website at www.newhaven.edu/campusaccess. For additional assistance from the Dean of Students Office, please contact: deanofstudents@newhaven.edu. If you require assistance with the technology requirement, please visit the Student Technical Support page.

Center for Learning Resources (CLR)

The Center for Learning Resources (CLR), located in the Peterson Library, provides academic content support to the students of the University of New Haven using metacognitive strategies that help students become aware of and learn to apply optimal learning processes in t

the pursuit of creating independent learners. CLR tutors focus sessions on discussions of concepts and processes and typically use external examples to help students grasp and apply the material.

Center for Student Success (CSS)

The Center for Student Success provides students with a multitude of resources available on campus and assists students in fulfilling their educational, social and personal goals.

Counseling & Psychological Services (CAPS)

CAPS offers confidential, free services in order to support student mental health and wellbeing. The services include individual and group therapy, support groups, consultations, and 24/7 crisis support. We are available in person and remotely, and are in the office M-F, 8:30-4:30. Please call us to schedule an appointment or with any questions at 203-932-7333; you can also schedule [online](#). If you experience a mental health crisis after hours, you can call our main number for support.

Myatt Center

The Myatt Center for Diversity and Inclusion is committed to creating a multicultural environment through intentional education, campus community engagement, and valuing the unique identities of each member of the Charger Community. Our commitment to diversity is driven by the core values of connection, belonging, inclusivity, equity, acceptance, and accountability. The Myatt Center's focus is to create a respectful and inclusive environment based on our awareness and ability to engage with others who are different on many levels including ethnicity, race, sexual orientation, gender, military, religious belief, and life experiences.

Marvin K. Peterson Library

The Library provides access to online databases, e-books, e-journals, electronic U.S. Government Documents, print books, educational games, and audiovisual materials. A search can be conducted through all these resources at once by using the [search box "Articles, Books, & More."](#)

The Library provides three floors with individual quiet study space, collaborative group study space, study rooms with technology, whiteboards, Dell desktops, iMacs, scanners, and printers. The entire library is a wireless zone.

Librarians assist in locating relevant sources of information for research papers, thesis, honors thesis, and other projects. Librarians answer general reference questions and help with effectively evaluating sources of information. [Help is available](#) through a Chat Service, 24/7 Ask a Librarian Service, a Zoom Reference Service, and by [E-Mail](#). Complete the [Research Consultation Form](#) to arrange a time convenient for you.

[LibGuides](#) are created to assist students with research. They contain an overview of resources available through the library, as well as tutorials, subject guides, and course specific guides.

University Writing Center

The mission of the Writing Center is to provide high-quality tutoring to undergraduate and graduate students as they write for a wide range of purposes and audiences. Tutors are undergraduate and graduate students who are majoring in a variety of fields across the University. We are here to work with you at any stage in the writing process; just bring in your assignment, your ideas, and any writing you've done so far. To make an appointment, you can register for an account with our scheduling site <https://newhaven.mywconline.com> or visit us in person at our desk on the first floor of Peterson Library (just to the left after you enter the library).
